

Redistricting

Get Involved.

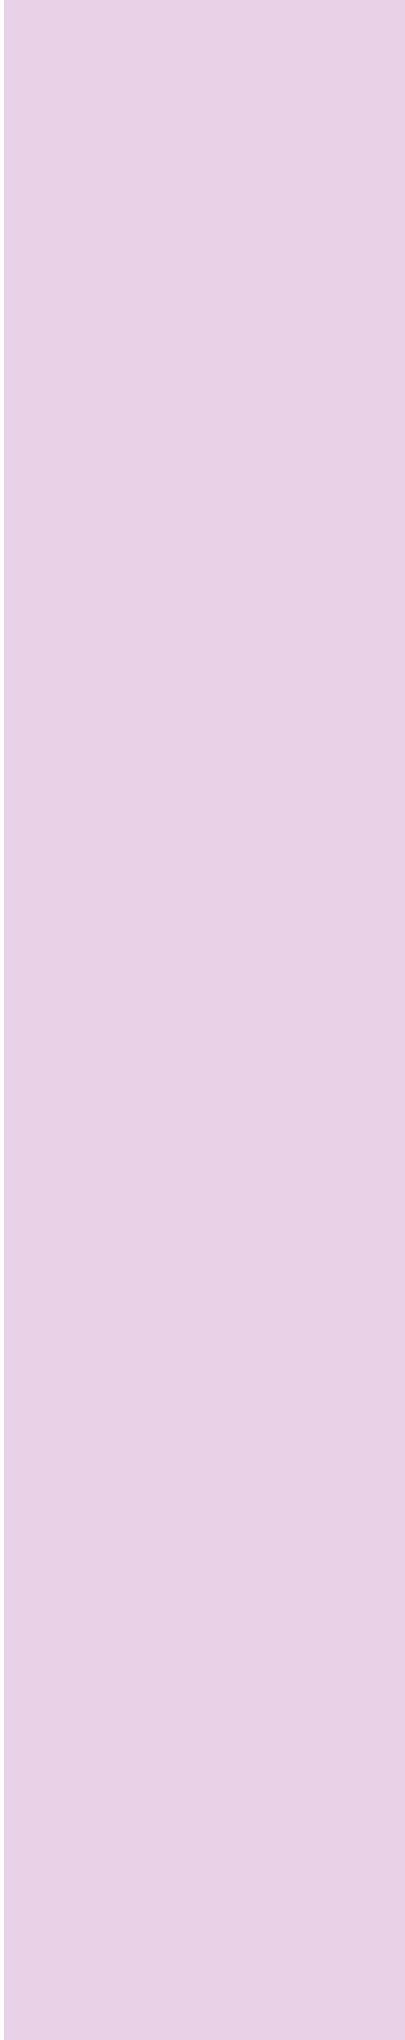

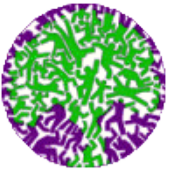

Redistricting: the process of redrawing district lines to accommodate population changes reflected in the census

What you can do:

- **Know the options.** The mapping software Maptitude can be used to show redistricting options in individual communities.
- **Ask the right questions.** What will be the procedures and process for redrawing district lines? Who are the staff people who will be involved in analyzing Census data to assist with redrawing lines?
- **Host a forum.** Contact SCSJ to see if a staff member would be able to provide resources and expertise regarding the importance of knowing and advocating for redistricting rights.
- **Attend a public hearing.** Lawmakers are more likely to respond to an engaged community.
- **Get educated.**
